General installation instructions for Atlantic basin stands

Important Information:

Please check the products for transport damage and that contents are complete before installation.

Consult a qualified plumber if you have any problems installing this product.

Complaints made following installation regarding the above cannot be accepted.

Atlantic Washstand – Metal Legs

Thank you for purchasing this product. These instructions relate to the following products.

Atlantic glass leg basin stand

Atlantic chrome leg basin stand

Before you start:

Check you have the necessary tools for the installation. It is advisable to prepare a clear area to assemble the products. Lay a soft blanket or sheet to protect the metal finish from scratches.

Tools Required

Hand Held Drill

Safety Goggles

Spirit Level

Tape Measure

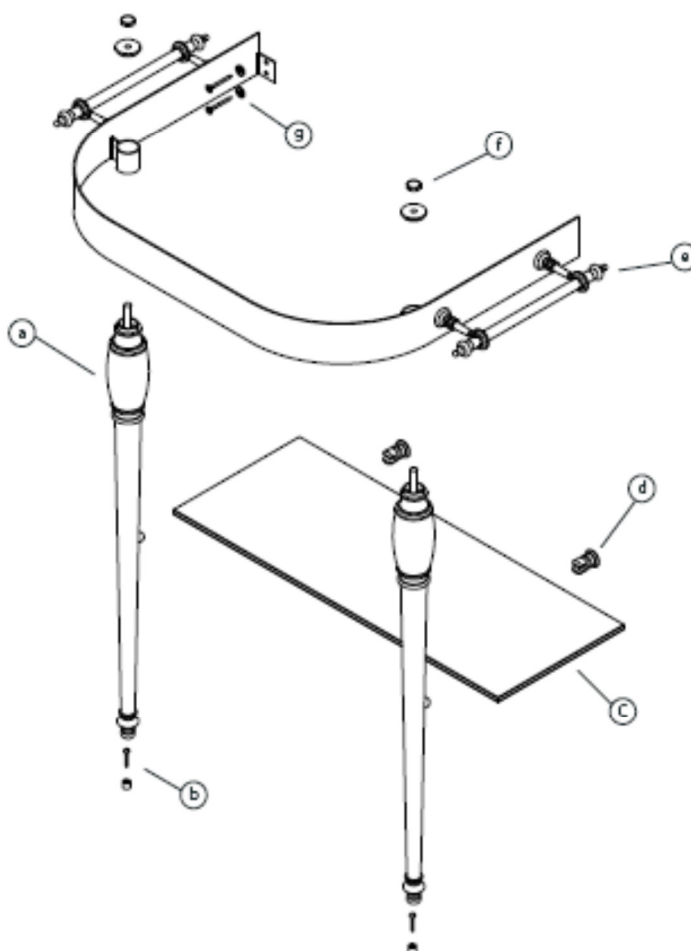

Pencil

Assembly Instructions

Ref	Part	Qty
a	Leg assembly	x2
b	Floor screw & stud set	x2
c	Glass shelf *	x1
d	Shelf stud *	x2
e	Towel rail	x2
f	Leg securing nut	x2
g	Wall screws	x4

*Not compatible with glass leg stand

Atlantic Washstand – Metal Legs

1: Offer up one of the assembled legs to the locating ring on the inside of the trim section. Tighten down the leg securing nut onto the top of the ring, securely tighten the leg with the shelf stud (not applicable to glass leg stand) facing the wall. Repeat this process with the second leg.

2: Position the assembled stand in the required position against the wall to which it is to be attached.

3: Ensure that the legs are standing fully upright and perpendicular to the floor. Also ensure that the sides of the trim are sitting square and true to the wall.

4: Mark the wall where the screw holes will need to be drilled. Mark the floor around the foot of the unit.

5: Measure the distance marked 'Z' on the diagram and add 4mm to determine the correct height for the shelf studs to be affixed to the wall. The spacing of the studs should be the width of the shelf minus 140mm. It is suggested that each stud should be inset from the edge of the glass by 70mm. Mark the wall according to this guideline.

CAUTION: Before carrying out the following steps ensure there is no hidden pipework or cables in the area that you intend to drill.

Always ensure that you take the necessary safety precautions.

NOTE: It may be wise at this stage to double check that the holes and markings for fixing are correct. Ensure that the stand will stand square and true to the wall and floor.

6: Remove the stand from the wall and drill appropriate sized holes for the insertion of screw plugs. Insert plugs into wall.

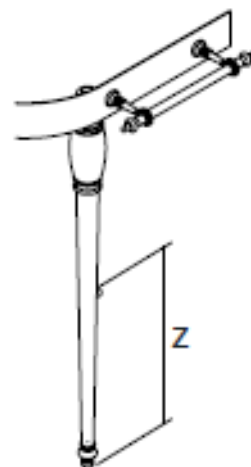

7: If necessary drill pilot holes into the floor where the location of the floor pegs will be.

8: Position the floor pegs carefully and screw them into position.

CAUTION: Affixing the floor pegs is a critical measure in ensuring the safe and proper installation of this product. This is a health and safety measure and must be carried out in order to maintain the structural integrity of the stand.

9: Locate the stand onto the floor pegs and align the holes in the side trim with the plugs in the wall. Using the screws and washers fix the stand into position.

Atlantic Washstand – Metal Legs

Assembly Instructions

10: Carefully lower the Atlantic basin into position on the basin stand - taking care not to scratch the front of the basin on the metal trim. You should now follow the instructions provided within your Atlantic basin in order to affix it to the wall.

11: Once you are happy with the installation of the basin and the stand, proceed to seal the rear of the basin with the wall using a thin bead of silicon sealant. You are now ready to complete the necessary plumbing in of taps and waste fittings.

Care & Maintainance

You have just acquired a high quality and expensive piece of furniture and are about to put it in the most hostile environment in the house! We have been producing these fine products for many years and our experience is that they will give years of pleasurable service if a few simple measures are taken to look after them.

Ceramic

The glazed finish of your sanitary ware should be cleaned after use by applying a little cream type cleaner. Apply using a sponge or damp cloth and rinse thoroughly with clean water. Cleaners containing abrasive materials should be avoided.

Metal

Parts with Chrome/Gold finish should be cleaned with a damp soft cloth only. The use of detergents and abraasive cleaning agents should be avoided as these will cause damage to the finish of the metal.
